

Daily Internship Report

Name: Ishmeet Singh Gill

Internship: Data Analyst Internship

Project: Twitter Analytics Dashboard

Report Date: 22 August 2026

Internship Day: Day 4

1. Introduction

I am currently pursuing a Data Analyst Internship, where I am gaining practical knowledge of data analysis and visualization using Power BI. As part of my internship, I am working on a project titled Twitter Analytics Dashboard.

2. Background

The internship focuses on developing practical skills required for data analysis. During the internship, I am learning how to work with data, analyze information, create visualizations, and develop interactive dashboards using Power BI.

3. Learning Objectives

The main objectives of my internship are:

- To understand the fundamentals of data analytics.
- To improve my Power BI skills.
- To learn DAX formulas and measures.
- To understand data visualization techniques.
- To develop an interactive Twitter Analytics Dashboard.

- To gain practical experience in solving data-related problems.

4. Activities and Tasks

During the internship so far, I have been working on the Twitter Analytics Dashboard project.

On 22 August 2026 (Day 4) :

- Learned the basics of DAX (Data Analysis Expressions).
- Practiced basic DAX queries and formulas.
- Learned how DAX can be used to perform calculations and create measures in Power BI.
- Learned the basics of data visualization in Power BI.
- Practiced creating and using basic charts and visual elements for dashboard development.

5. Skills and Competencies

Through today's learning, I developed the following skills:

- Basic knowledge of DAX.
- Understanding of DAX formulas and measures.
- Basic Power BI visualization skills.
- Understanding of how to present data using charts.
- Improved knowledge of dashboard development.

6. Feedback and Evidence

The learning activities were completed as part of the internship training and project work. Practical exercises in Power BI helped me understand how DAX and visualizations are used in real-world data analysis.

7. Challenges and Solutions

Initially, understanding DAX formulas and their application in Power BI was challenging. By practicing basic DAX formulas and working with Power BI visualizations, I improved my understanding of these concepts.

8. Outcomes and Impact

At the end of Day 4, I gained a basic understanding of DAX and Power BI visualizations. This knowledge will help me in developing the Twitter Analytics Dashboard and performing data analysis more effectively.

9. Conclusion

The fourth day of my internship was focused on learning DAX and basic data visualization in Power BI. The practical learning has helped me strengthen my understanding of Power BI and prepared me for further development of the Twitter Analytics Dashboard.
